Affordable, feature-rich web content management

Savvy CM™ Professional is the best tool for companies, schools, institutions and organizations to power their websites. Savvy CM™ Professional is a proven, easy-to-use, easy to implement, and affordable content management solution.

Savvy CM™ Professional features a powerful, browser-based editor:
The Savvy CM™ Professional editor allows anyone to create new or update existing web content without knowing anything about sophisticated web applications or computer code. It’s just like using a typical word processing program and is easily installed into your website and runs on your browser. You and your team can access it from any location. You no longer need to pay additional fees to update your website. This also eliminates delays in getting updates done. Important information is updated and enhanced instantly. Again, anyone on your staff can maintain your website.

Features Include:

Editor Support for Mac OS X, Windows and Linux:
Savvy CM™ Professional supports any Mozilla 1.4 compatible browser. Savvy CM™ plays nicely with all operating systems.

Real Page Names: With Savvy CM™ Professional your pages are named in a human readable and search engine friendly way. Each page of your site has a name that you give it. Name your pages as appropriate for your site and the intent of that page, instead of having the software name your pages for you.

Extendable with Custom Code: Savvy CM™ Professional allows you to add or extend features with additional custom code and easily integrate third party applications such as shopping carts, blogs, email subscriptions and more.
